

MAGIC STIXS

Truss spar
end cap (point 098)

point 125 Carbon
tube (stand-off)

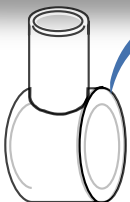

16" in length

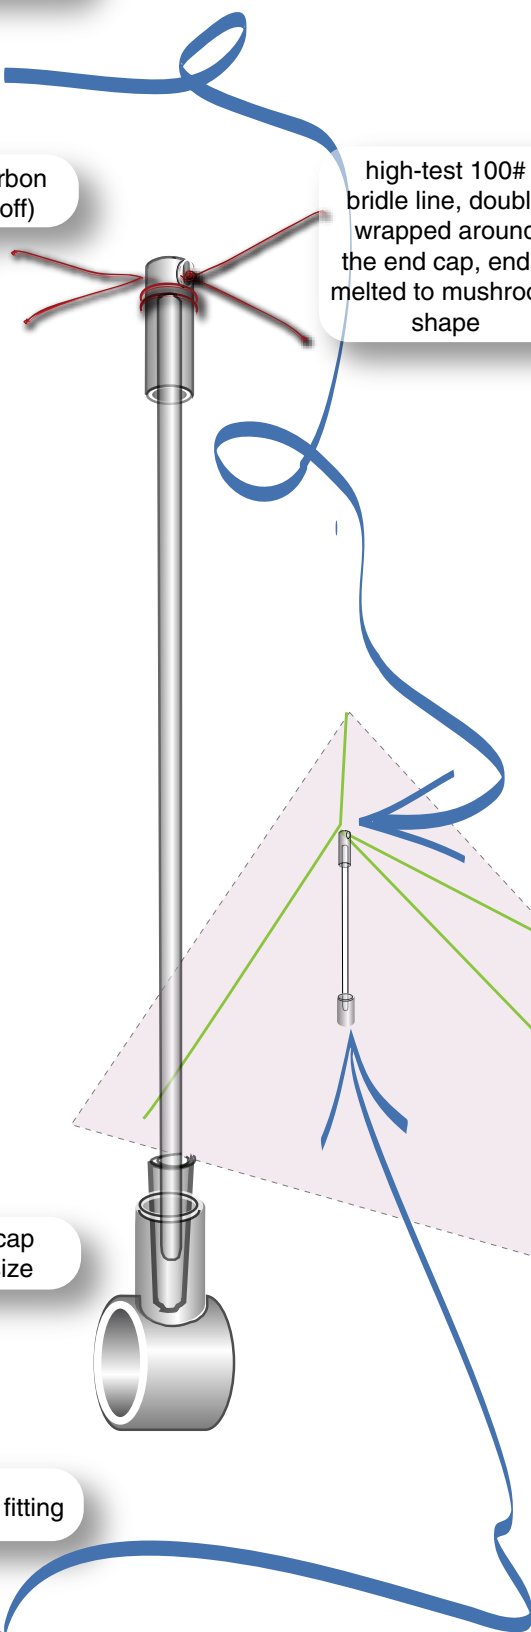

Vinyl spar cap
point 125 size

Apa spreader fitting

high-test 100#
bridle line, double
wrapped around
the end cap, ends
melted to mushroom
shape

Measure down from the
top of the leading edge $11\text{-}\frac{3}{8}$ "

Larks-head the truss lines such
that none of the framing
members are distorted,
using the Red lines on the end-cap
and loops on the kite corners as
indicated by the green rules

Use the smallest knots
possible, or consider
sewing the loops shut

do NOT glue any of
the parts together!!!

$11\text{-}\frac{3}{8}$
